

Proskauer's Exclusive Study Analyzes 2015 IPOs

March 8, 2016

Proskauer's [Global Capital Markets Group](#) presents the third annual [IPO Study](#), a comprehensive analysis of U.S.-listed initial public offerings in 2015 and identification of three-year comparisons and trends of U.S.-listed initial public offerings over the same period.

The study examines 90 U.S.-listed 2015 IPOs with a minimum initial deal size of \$50 million, and includes industry analysis on health care; technology, media & telecommunications; energy & power; financial services; industrials and consumer/retail. The study also includes a focus on foreign private issuers. It also makes year-over-year comparisons of extensive data about deal structures and terms, SEC comments and timing, financial profiles, accounting disclosures, corporate governance and deal expenses.

Underlying the study is the global Capital Markets Group's proprietary IPO database, which is a valuable resource for sponsors and companies considering an IPO as well as for IPO market participants and their advisors.
