The Acritas Stars Database and Report is the result of an 18-month long survey, which asks participants to name exemplary outside counsel with whom they had worked, and to describe the particular characteristics that qualified these individuals to be outstanding, or “Star Lawyers.” The database includes 10,000 client-nominated, stand-out lawyers in private practice. This is the fourth annual global study launched by Acritas, after members of an Acritas general counsel panel requested an online source to find highly recommended local counsel and specialists.
