

Contractors: VETS-4212 Filing Window Now Open Until September 30, 2023

Government Contractor Compliance & Regulatory Update on **August 1, 2023**

Federal contractors and subcontractors meeting the VEVRAA eligibility threshold of having 50 or more employees and at least one federal contract totaling \$150,000 or more ("Covered Contractors") must annually file a VETS-4212 Report. The VETS-4212 filing period is now open, and contractors have until September 30, 2023 to submit their reports. The report is similar to an EEO-1 report, but provides a breakdown of a Covered Contractor's workforce based on protected veteran status.

Covered Contractors can [electronically file](#) the VETS-4212 report, or email or physically mail a [paper form](#) to the DOL. The DOL "recommend[s] that you file your form electronically."

FAQs on the Vets-4212 Report can be found [here](#). Covered Contractors are encouraged to consult with counsel as needed when preparing their report filings.
