Proskauer Advises RGREEN INVEST on Raising More than €900 million for INFRAGREEN V Fund Dedicated to Financing European Energy Sovereignty

March 24, 2026

PARIS, March 24, 2026 – Proskauer advised RGREEN INVEST, an independent management company specializing in financing the energy transition, on the closing of its INFRAGREEN V strategy at over €900 million, which will be deployed in support of energy sovereignty and European industrial competitiveness.

Designed to support infrastructures that deploy competitive solutions for the energy transition, INFRAGREEN V is aligned with a long-term ambition, at a time when energy is more than ever a key pillar of Europe’s economic and industrial resilience.

The fund invests in infrastructures aimed at strengthening energy independence while fostering more competitive energy prices—an essential condition for reindustrialisation and European sovereignty. It primarily targets the European mid-market segment, financing renewable energy production projects, storage, and the electrification of end uses. Special attention is given to high-potential regions, particularly in Central and Eastern Europe, where investment needs are significant and where opportunities for developing energy infrastructures play a critical role in economic growth.

INFRAGREEN V, labelled Greenfin and classified as Article 9 under the SFDR regulation, introduces for the first time a value-sharing mechanism directly linked to the achievement of climate objectives. Already well advanced in its deployment, these investments address the specific energy challenges of each country while contributing to a common goal: accelerating the European energy transition in support of its sovereignty and competitiveness.

INFRAGREEN V has benefited from the support of leading institutional investors, foremost among them the Fonds de Réserve pour les Retraites (FRR) and the European Investment Fund (EIF). Their commitment reflects confidence in the fund's strategy and recognition of the essential role played by RGREEN INVEST in financing the energy transition. Alongside them, several major insurers and a broad group of institutional investors, both French and international, have chosen to join this initiative.

The Proskauer team advising RGREEN INVEST was led by partner Marcela Moraru and included associate Léa Le Romancer (Private Funds).

RGREEN INVEST is an independent management company authorised by the French Financial Markets Authority (AMF) under number GP-15000021. This press release is provided for information purposes only. The fund mentioned is reserved for professional and equivalent investors. Any investment carries risks, including the risk of capital loss. Before making any investment decision, consult the fund's legal and regulatory documentation.
